

Aditya Nair

I am a computational and systems neuroscientist working at the intersection of neurobiology, machine learning, and dynamical systems. I combine neural imaging, electrophysiology, and generative machine learning tools to understand social behaviors such as aggression and mating. My goal is to uncover key computational properties of neural circuits and re-conceptualize neuropsychiatric disorders as impaired neural computations.

EDUCATION

California Institute of Technology PhD., Computation & Neural Systems	2019- Present
Primary Advisor: David J. Anderson, <i>Caltech</i> Co-Mentors: Scott W Linderman, <i>Stanford Uni.</i>	Expected Graduation 2024
National University of Singapore B.S., Life Sciences, <i>Honors with Highest Distinction</i>	2014- 2018
Karolinska Institute Exchange Semester <i>Erasmus Scholar</i>	2017

RESEARCH EXPERIENCE

California Institute of Technology A*STAR National Science Graduate Fellow in Neuroscience, Advisor: David J. Anderson. <i>(1) Identified computational circuit motifs that control the integration of aggressive states in the hypothalamus.</i> <i>(2) Extensively collaborated with experimentalists to apply unsupervised, machine learning based dynamical systems methods to neural and behavior data.</i>	2019- Present
Institute of Molecular and Cell Biology, Singapore Research Officer. Advisors: Weiping Han, George Augustine.	2018- 2019

Discovered a neural mechanism for co-release of opposing neuromodulators by combining slice electrophysiology and computational modeling.

Nanyang Technological University, Singapore 2017-
Honors Researcher. Advisor: George J. Augustine. 2018
(1) Uncovered the neuromodulatory role of cholinergic inputs to the claustrum. (2) Dissected the composition of cell types in the striatum, claustrum, and cerebellum.

Karolinska Institute, Sweden 2017
Undergraduate Researcher. Advisor: Gilad Silberberg,
Created ML methods for 3D automated reconstruction of neuronal morphology from fluorescent images.

National Neuroscience Institute, Singapore 2015-
Undergraduate Researcher. Advisor: Lim Kah Leong, 2017
(1) Studied the role of Parkin and Lipoprotein lipase in Parkinson's disease (2) Created user-friendly computer vision methods for automated analysis of fluorescent images.

AWARDS AND
HONORS

National Science Graduate Scholarship, Agency of Science, 2019-
Technology and Research, Singapore (A*STAR) 2024

National University of Singapore Science and Technology 2014-
Undergraduate Scholarship 2018

Best Speaker Award, Chairman's Session, A*STAR 2019

Simons Foundation Award for Best Poster, Gordon Research 2019
Conference (GRC) for Modulation of Neural Circuits and
Behavior

Trainee Professional Development Award, Society for 2018
Neuroscience (SfN)

Erasmus Plus Undergraduate Scholarship 2017

INVITED TALKS

- **Cosyne 2023, Montreal, Canada**
Workshop on Generative Models for Neuroscience.
Latent dynamical models discover state dependent line attractor-like representations in the hypothalamus during social behavior.
- **Gordon Research Conference (GRC) on the Hypothalamus, 2022, Ventura, CA**
An approximate line attractor in the hypothalamus that encodes an aggressive internal state.
- **Cosyne 2022, Cascais, Portugal.**
Dynamical systems analysis reveals a novel hypothalamic encoding of state in nodes controlling social behavior.
(Selected from top 3% of all submissions)
- **Society for Claustrum Research Meeting, Salk Institute, 2018, San Diego, CA**
The claustrum receives neuromodulatory input from the basal forebrain.

CONFERENCE
PRESENTATIONS

- Amit Vinograd*, Aditya Nair*, Scott W Linderman, David J Anderson.
Neural implementation of a hypothalamic line attractor encoding an internal state.

HHMI Annual Science Meeting, 2023

- **Aditya Nair**, Martin Graf, George J. Augustine.
Opposing cholinergic gain control of the claustrum.
Society for Neuroscience 49th Annual Meeting, 2019.
- **Aditya Nair**, Martin Graf, George J. Augustine.
Opposing cholinergic gain control of the claustrum.
Gordon Research Conference on Neuromodulation, 2019,
Awarded Simon's Foundation Award for best poster.
- **Aditya Nair**, Martin Graf, George J. Augustine.
Cell-type specific cholinergic modulation of the claustrum.
Society for Neuroscience 48th Annual Meeting, 2018.
Awarded Trainee Professional Development Award, SfN.

TEACHING
EXPERIENCE

- Co-organizer and Lecturer** 2023,
Chen Institute Data Science and AI for Neuroscience 2022
Summer School, *Caltech*
I co-founded and organized a summer school for computational neuroscience, creating a curriculum, lecture series and homework notebooks.
- Guest Lecturer**, CNS 220: Genetic Dissection of Neural Circuit Function, *Caltech* 2021-2024
I teach a section focused on computational approaches to understand cell-type specific computations in social behavior.

GRANTS
AWARDED

- Schmidt Academy for Software Engineering** 2023
Wrote and secured a grant of \$100,000 from the Schmidt Foundation to develop neural data analysis tools at scale for research and biomarker development.

COURSES
AND TRAINING

- Max Plank Florida Institute for Neuroscience Florida**, Advanced Neuroimaging Techniques 2020
- Riken Center for Brain Science, Japan**, Summer Program in Neurotechnology 2019

COMMUNITY
INVOLVEMNT

**Resident Associate,
Blacker House, Caltech**

2021-
present

I advise and mentor undergraduate students who reside in Blacker House at Caltech, focusing on helping students transition into university life and take part in research on campus.

**Resident Assistant and Student Mentor,
National University of Singapore**

2015-
2018
